PONDICHERRY

ABOUT

Enthusiastic Software Developer with a strong foundation in programming and problem-solving. Skilled in Java, JavaScript, and basic software development concepts. Eager to apply technical knowledge to build efficient applications and grow in a challenging development environment.

SKILLS

- Java, HTML,CSS, JavaScript

PLATFORMS AND TOOLS

- Github, Arduino

OFFICE TOOLS

- Power BI, Excel, MS word

CERTIFICATIONS

- CCNA (Cisco certified Network Associate)
- Drone Technology certified by Atal Incubation Center-Pondicherry.
- WIPRO certified Java Full Stack

EDUCATION

BE - Electronics and Communication Engineering - IFET College Of Engineering
Year of passing:2026
CPGA : 8.17 (till 6th sem)

HSC (12th) - Amalorpavam Higher Secondary School, Pondicherry
Year of passing: 2022
Percentage : 79.5%

SSLC(10th) - Amalorpavam Higher Secondary , Pondicherry
Year of passing - 2020
Percentage: 77%

LINGUISTIC PROFICIENCY

English
(Full Professional Profiency)
Tamil
(Native or Bilingual Proficiency)

WORK EXPERIENCE

INTERN - WEB DEVELOPER

LeMeinz Technologies Private Limited , Pondicherry **(2024)**

- Gained hands-on experience in frontend and backend development through real-time projects.
- Improved skills in UI design, API integration, and working with web/app development frameworks.

INTERN - PYTHON FULL STACK

VEI Technologies Pvt Ltd , Tindivanam **(2025)**

- Strengthened backend development skills using Python and frameworks like Django/Flask.
- Gained practical knowledge in database handling, SQL queries, and integrating frontend with backend.

EMBEDDED SYSTEM & IOT TRAINEE-INDUSRTY

TVS Training Services Ltd, Chennai **(2025)**

- Gained practical experience working with microcontrollers, sensors, and circuit design.
- Improved skills in Embedded C, firmware testing, and hardware debugging.
- Learned PCB basics, wiring methods, and problem-solving for embedded systems.

INTERN - DESIGNING AND PANNEL ASSEMBLER

Mahaveerer FABS Pvt . Ltd , Chennai **(2025)**

- Acquired hands-on experience in panel wiring, assembly, and electrical component identification.
- Learned to read and interpret design drawings and panel layouts (including basic AutoCAD understanding).
- Developed skills in quality checking, following safety standards, and working in a systematic process.

AWARDS

- 2nd Prize – Project Expo at Dhanalakshmi Srinivasan College of Engineering ,Chennai
- 3rd Prize – Poster Presentation , IFET College of Engineering
- 3rd Prize - E-Gadgets project Expo,IFET College of Engineering
- 1st Prize - Basket ball and Throw ball womens conducted on 25th year annual sport meet
- Selected in 1st round of Smart India Hackthon in our college level

PUBLICATIONS

- Arduino-Based Alcohol Detection Device: Enhancing Safety in Vehicle Operation through Sensor Technology, Asian Journal of Applied Science and Technology, Vol. 8, Issue 1, March 2025
- A Novel and Reliable SOS Alert Band System for Women Safety, Asian Journal of AppliedScience and Technology, Vol. 9, Issue 1, Jan–March 2024

LEADERSHIP

Class Representative
Managed class coordination and communication
Student In-Charge -Tamil Sangam
Organized and led cultural events promoting Tamil language and heritage.

PROFESSIONAL MEMBERSHIP

ISTE(Indian Society for Technical Education)

ACADEMIC PROJECTS

Arduino Based Toll Tax System (2nd sem)

- Developed an automated toll collection system using Arduino with sensors (IR/RFID) for vehicle detection and identification.
- Implemented real-time toll calculation and automatic transaction handling to ensure fast and accurate processing.
- Integrated LCD display and servo motor barrier mechanism to streamline traffic flow and enhance operational efficiency.

VIRO SHIELD - INTELLIGENT DOOR AUTOMATION SYSTEM (6th sem)

- Initiated and led the creation of an automated entry control system integrating temperature screening sensors to enhance security and health safety. Managed hardware and software development efforts ensuring project success
- Enhanced safety and energy efficiency by integrating alert signals and auto-close functionality based on sensor feedback.

HACKTHON PROJECT

SecureShe - Wearable Safety Device (2024)

- Conceptualized and lLed the design of an offline GSM-based wearable safety device with nerve sensors on the foot thumb for discreet panic detection. The device triggers automatic SOS alerts using biometric and environmental sensors without mobile dependency.
- Enhanced user safety with quick-response mechanisms, LED/Vibration indicators, and reliable real-time activation.
